Mahmoud AlEbrahim

Senior Flutter Developer | Mobile Architect | Team Lead

ma453935@gmail.com +963 994 014 438 Aleppo, Syria

linkedin.com/in/mahmoud-alebrahim github.com/Mahmoud-Al-Ebrahim

PROFESSIONAL SUMMARY

Senior Flutter Developer and Team Lead with strong experience architecting and delivering scalable multi-application systems across eCommerce, EdTech, Healthcare, AI-powered platforms, and Delivery ecosystems. Proven ability to lead development teams, manage client communication, design system architectures, and deliver production-grade applications published on both App Store and Google Play.

Specialized in Clean Architecture, advanced state management (Bloc, Riverpod), performance optimization, offline-first strategies, backend integration, and full-stack development using Node.js and MongoDB. Passionate about building maintainable systems and mentoring developers.

PROFESSIONAL EXPERIENCE

Senior Flutter Developer, *KwanX(Syria)*

01/2026 – Present | Aleppo,Syria

- Architected and delivered a **production-grade, real-time multi-role system** using Flutter and GraphQL (Hasura).
- Designed a **scalable Clean Architecture** with SOLID principles and optimized data synchronization.
- Built a **robust data layer** with subscriptions, caching, optimistic updates, and resilient error handling.
- Enforced **code quality and delivery standards** via Git workflows, CI/CD, and structured task planning.

Tech: Flutter, Dart, GraphQL, Hasura, GitLab CI/CD

Senior Flutter Developer, *Prootech(Syria)*

03/2025 – 01/2026 | Aleppo , Syria

- Architected and delivered **complex mobile systems** including social-commerce and EdTech platforms at production scale.
- Designed **scalable state management and data flows** for carts, orders, analytics, offline access, and real-time interactions.

MAJOR PROJECTS & ACHEVING

Led Flutter development teams. Conducted code reviews and enforced Clean Architecture principles. Designed ERDs and system diagrams. Mentored 20+ junior Flutter developers. Taught algorithms and data structures to 1000+ students. Supervised 5+ senior graduation projects.

Educational Course & Examination Platform,
(Team Lead & Mobile Architect)

- Architected and delivered a **full EdTech ecosystem** (4 Flutter apps) with automated exams and secure content delivery.
- Owned requirements, planning, and **production releases** across **App Store** and **Google Play**.

Veterinary Medical Consultation Platform

- Built a **subscription-based consultation platform** (Silver, Gold, Diamond) with dynamic lifecycle driven by backend state.
- Implemented **real-time doctor–client chat** and subscription validation with quota management.
- Delivered and published the **production app on Google Play**.

Full Restaurant Delivery Ecosystem,
(Full-Stack Development)

- Architected a **multi-app food delivery platform** with full order lifecycle, analytics, and admin tooling.
- Built and integrated **Node.js/MongoDB backend** powering all mobile clients.

AI-Powered Smart Gallery Application

- Developed an **Android-style gallery application** with on-device **TFLite-powered image search**.
- Enabled **smart search across local photos and videos** using embedded AI models.
- Implemented efficient **local storage and media indexing**.

Marketplace & Store Discovery Platform
Developed and launched a **social-commerce app** (stores, social features, cart system, seller analytics) on **Google Play**, including filtering and ordering workflows.

- Ensured **high performance, modularity, and long-term maintainability** across multi-feature applications.

Flutter Team Leader, *Ramaaz (Turkey)*
10/2023 – 12/2024 | Turkey
- Led architecture and delivery of **production eCommerce and delivery apps** published on App Store and Google Play.
- Implemented **offline-first systems**, multi-backend integration, and API optimizations.
- Extended **third-party packages** and drove cross-team collaboration to ensure release quality.

Flutter Developer, *Ulu (Syria)*
03/2023 – 10/2023 | Syria
- Delivered features for **production food delivery platforms**, including real-time updates and backend integrations.
- Improved **performance and stability** across critical user flows.
- Assisted with **App Store and Google Play deployments**.

Flutter Trainee, *404 Developers (Syria)*
11/2021 – 03/2023 | Syria
Specialized in advanced responsive and adaptive UI. Applied Clean Architecture and TDD principles. Built multiple production-level mini applications.

IT Instructor & Mentor
10/2018 – Present | Aleppo , Syria
- Conducted training sessions for **1000+ students** in Flutter, web development, and general IT topics.
- Created hands-on tutorials, workshops, and learning materials that helped students successfully build their first apps.
- Guided learners through coding best practices, problem-solving, and project completion.

TECHNICAL SKILLS

Mobile Development
Flutter, Dart, Bloc, HydratedBloc, Riverpod, GetX

Architecture & Patterns
Clean Architecture, SOLID, DDD, MVC, MVVM, TDD

Backend & Databases
Node.js, MongoDB, GraphQL, Hasura, Nhost, SQL

Integrations
Firebase, Dio, WebSockets, Pusher, Google Maps, Bluetooth, Sqflite

AI & Advanced
TFLite, On-device AI models, Performance Optimization

Tools
Git, Sentry, Smartlook, Cloudinary, Figma, Adobe XD

EDUCATION

Master in Software Engineering, *Aleppo University*
04/2023 – Present | Aleppo, Syria

Bachelor in Software Engineering,
Aleppo University
10/2017 – 10/2022 | Aleppo, Syria
Ranked 12th in class

AWARDS

Top 10, *College Programming Competition*

High Rank, *SCPC Competition*
(2 Years)

LANGUAGES

Arabic
Native

English
Professional Working Proficiency
